

AADYA DIXIT

Ghaziabad, India | +91-9315808067 | [E-mail](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

B.Tech Computer Science student building hands-on expertise in AI-powered full-stack development. Proficient in developing scalable backend systems using Python, Django, and FastAPI while managing data with MySQL and MongoDB. Practicing the integration of Machine Learning and NLP pipelines to automate data handling, as demonstrated through competitive hackathons and academic projects.

EDUCATION

IMS Engineering College (AKTU) | Ghaziabad, India

Bachelor of Technology in Computer Science; CGPA: 7.0/10

2023 – 2027 (Expected)

Senior Secondary Education (Class XII Dual-Track) | Sahibabad, India

National Institute of Open Schooling (NIOS): **PCM (Physics, Chemistry, Mathematics) – 85%**

St. Mary's Christian School (CBSE): **PCB (Physics, Chemistry, Biology) – 75%**

St. Mary's Christian School (CBSE) | Sahibabad, India

Secondary School (Class X) – 70%

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, C++, HTML5, CSS3, SQL
- **Backend Development:** Django, Flask, FastAPI, REST APIs, Node.js
- **Frontend & UI:** React.js, Bootstrap, Tailwind CSS
- **Databases & Cloud:** MongoDB, MySQL, PostgreSQL, AWS (S3/EC2)
- **AI & Data Engineering:** OpenAI API, LangChain, Hugging Face, NumPy
- **Tools & Technologies:** Git, GitHub, VS Code, Postman

PROJECTS

Personal Developer Portfolio | Systems & UI Engineer | [GitHub](#)

- Built and deployed a responsive, high-performance web portfolio highlighting core software projects and professional software engineering competencies.
- Utilized clean semantic structure with **HTML5**, modern layout styling with **CSS3**, and user-interactivity scripts with **JavaScript** to maximize viewport cross-compatibility, improving rendering speed by 20%.
- Optimized client-side page load performance and asset sizing, maintaining an organized and modular source-code architecture within **Git/GitHub** version control frameworks.

Volunteer Registration System | Full-Stack Developer | [GitHub](#)

- Designed and engineered a scalable full-stack web application using **FastAPI** and **Python** to streamline and automate organizational event-volunteer coordination pipelines.
- Developed structured relational database schemas using **MySQL** to manage 1,000+ high-throughput registration records, optimizing data integrity and retrieval execution times, reducing retrieval time by 15%.
- Implemented secure user onboarding and custom dashboard modules, integrating seamless frontend forms with robust backend validation logic for real-time status tracking.

Smart Material Construction Optimizer | AI & Resource Engineering | Academic Project 2026

- Engineered an intelligent automated decision-support system to optimize raw material logistical selections and resource allocation strategies for commercial construction lifecycles.
- Developed predictive data pipelines and machine learning algorithms analyzing complex multi-variable constraints, including cost constraints, durability indexes, availability metrics, and environmental sustainability factors, achieving 18% better accuracy.
- Implemented the underlying data analytics and computational engine utilizing **Python**, **Machine Learning** models, and **Jupyter Notebook/Google Colab** optimization scripts.

CERTIFICATIONS

- **Samagra Techfest** – Organized by ITS College, Mohan Nagar | April-2026- [Certificate](#)
- **Hack-a-Thon Techfest**- Coordinated by IMSUC, Ghaziabad | April-2026- [Certificate](#)
- **SDGI Hackathon**- Organized by Sunderdeep Global University | March-2026- [Certificate](#)
- **Entrepreneurial quiz competition**- IMSEC , Ghaziabad | September 2025
